

1.3.1 Institution integrates crosscutting issues relevant to Professional Ethics, Gender, Human Values, Environment and Sustainability into the Curriculum

In order to integrate the cross-cutting issues relevant to gender environment and sustainability, human values and professional ethics the college has imbibed different types of courses in the curriculum. Some enhance professional competencies while others aim to inculcate general competencies like social values human values environment sensitivity etc thereby leading to the holistic development of students. Gender sensitivity and gender sensitisation is accomplished through the sole objective of the college which is to strengthen women's empowerment by imparting non-conventional education to women.

The college has inculcated Environment Science as a compulsory subject for second year students of all programs. The college also shoulders responsibility to inculcate the sense of social responsibilities and national security and integrity. The college has its own NSS unit which focuses on cleanliness drive, water awareness program, organisation of international yoga day, youth day, constitution day and other national festivals The college has introduced certificate courses in foreign languages like German, Japanese and French of three credits in the curriculum for all the programs. Various add on courses are conducted by College like Aari work, Tally ACE to enhance skill of students.

2. Unit 2. Physical fitness Management

Physical fitness Management is to the human body what fine-tuning is to an engine. It enables us to perform up to our potential. Fitness can be described as a condition that helps us look, feel and do our best. Physical fitness is your ability to carry out tasks without undue fatigue. The components of physical fitness are cardiovascular endurance, muscle strength, muscle endurance, flexibility and body composition.

Physical fitness involves the performance of the heart and lungs, and the muscles of the body. In addition, since what we do with our bodies also affects what we can do with our minds, fitness influences to some degree qualities such as mental alertness and emotional stability.

Physical fitness has two types: general fitness (a state of health and well-being) and specific fitness (the ability to perform specific aspects of sports or occupations).

2.1 Physical Fitness Management

Physical Fitness Management is fine tuning of a body to carry out daily tasks and routine physical activities without fatigue is called physical fitness Management. In this Unit, we will look at the some components that make up physical fitness, how we can tune them and their benefits bring to our lives.

2.2 Cardiovascular Endurance

Cardiovascular endurance is a measure of the circulatory and respiratory systems, it is an ability to deliver oxygen and nutrients to and eliminate waste products from cells. Cells need oxygen and nutrients in order to fuel muscles during physical activity. When cells work, they produce wastes that need to be transport away. How efficiently body does these tasks is a measure of Cardiovascular endurance. At last it is an ability to perform tasks with more sustainable energy and for longer periods.

You can build your cardiovascular endurance through aerobic exercise, which is a type of exercise that uses oxygen to meet energy demands. The word aerobic means using oxygen, so aerobic exercise is literally exercise that uses oxygen. This oxygen is very helpful for body. The exercise is performed over time at low to moderate intensity, such as taking a comfortable jog, walking, Swimming, Dancing, and exercise with the treadmill
